This introductory note does not form a part of the Permit

The following Permit is granted under Regulation 13 of the Environmental Permitting (England and Wales) Regulations 2016 (S.I.2016/675) ("the EP Regulations") to operate an installation carrying out one or more of the activities listed in Part B to Schedule 1 of those Regulations, to the extent authorised by the Permit.

The Permit includes conditions that have to be complied with.

Techniques include both the technology used and the way in which the installation is designed, built, maintained, operated and decommissioned.

Brief description of the installation regulated by this permit

C. Elwell Transport (Repairs) Ltd is hereby permitted, in accordance with the requirements of the Environmental Permitting (England and Wales) Regulations 2016, to carry out a mobile crushing and screening activity as prescribed by Section 3.5 Part B (c) of Schedule 1, Part 1, (as amended) to the above Regulations, subject to the conditions outlined in this Permit.

Contacting the Regulator

This Permit has been issued by Cannock Chase District Council as the Regulator for this installation and the address above (Pg 2) is the Principle contact address for all matters relating to the Permit.

Confidentiality

The Permit requires the Operator to provide information to Cannock Chase District Council. The Council will place the information onto the public registers in accordance with the requirements of the EP Regulations. If the Operator considers that any information provided is commercially confidential, it may apply to Cannock Chase District Council to have such information withheld from the register as provided in the EP Regulations. To enable Cannock Chase District Council to determine whether the information is commercially confidential, the Operator should clearly identify the information in question and should specify clear and precise reasons.

Variations to the permit

Your attention is drawn to the Variation Notification Procedure condition in the permit. This Permit may be varied in the future. If at any time the activity or any aspect of the activity regulated by the following conditions changes such that the conditions no longer reflect the activity and require alteration, the Regulator should be contacted.

Revocation of the permit

Where an Operator intends to cease the operation of an installation (in whole or in part) the regulator should be informed in writing, The Regulator may revoke a permit in whole or in part, and may require the operator to take steps-

- to avoid a pollution risk resulting from the operation of the regulated facility; or
- to return the site to a satisfactory state, having regard to the state of the site before the facility was put into operation.

Transfer of the permit or part of the permit

Before the Permit can be wholly or partially transferred to another person, a joint application to transfer the Permit has to be made by both the existing and proposed holders, in accordance with Regulation 21 of the EP Regulations. A transfer will be allowed unless the Authority considers that the proposed holder will not be the person who will have control over the operation of the installation or will not ensure compliance with the conditions of the transferred Permit.

Responsibility under workplace health and safety legislation

This Permit is given in relation to the requirements of the EP Regulations. It must not be taken to replace any responsibilities you may have under Workplace Health and Safety legislation.

Appeal against permit conditions

Anyone who is aggrieved by the conditions attached to a Permit can appeal to the Appropriate Authority, (Secretary of State for the Environment, Food and Rural Affairs, in England and the Welsh Ministers in Wales) Appeals must be made in accordance with the requirements of Regulation 31 and Schedule 6 of the EP Regulations.

Appeals should be received by the Secretary of State for Environment, Food and Rural Affairs or the Welsh Ministers at the following addresses:

The Planning Inspectorate
Environment Team, Major and Specialist
Casework
Room 4/04 Kite Wing
Temple Quay House
2 The Square
Temple Quay
Bristol BS1 6PN

Or for appeals in Wales:

The Planning Inspectorate
Crown Buildings
Cathays Park
CARDIFF
CF10 3NQ

Please Note

An appeal brought under Regulation 31 (1) (b) and Schedule 6, in relation to the conditions in a permit will not suspend the effect of the conditions appealed against; the conditions must still be complied with.

In determining an appeal against one or more conditions, the Act allows the Secretary of State in addition to quash any of the other conditions not subject to the appeal and to direct the local authority either to vary any of these other conditions or to add new conditions.

Installation Description

A mobile crusher (Brown Lennox Crusher, Serial no. M1144559) and an Extec Robo Trac, (Serial no. 6138) are operated together on a batch basis to crush and screen feedstock materials comprising of construction and demolition wastes consisting primarily of concrete, brick tiles and ash.

The range of secondary aggregate materials produced for resale is as follows:-

Hardcore 75mm to 40mm

Hardcore >40mm

Ash >15mm

No materials are discarded from the process.

PERMIT CONDITIONS

Permitted Plant

- 1.0 The crusher used shall be a Brown Lennox Crusher, Serial no. M1144559. The screen used shall be an Extec Robo Trac, Serial no. 6138. No other plant or equipment shall be utilised without the written consent of the Regulator.

Visible Emissions

- 2.0 There shall be no visible airborne emissions of dust from the installation that cross the installation site boundary.

Monitoring of Emissions

- 3.0 Visual assessments of emissions shall be made frequently and at least three times per day during operations. The time, location and result of these assessments shall be recorded in a log book as required by condition 3.3 of this Permit. The installation shall be subject to a daily assessment when screening is not taking place.
- 3.1 In the event of visible emissions being observed, immediate action shall be taken to determine the cause of the emission and to abate the same. As necessary the activity or process being undertaken shall be adjusted to minimise the emissions and details of the observations made and remedial action undertaken shall be recorded in the log book.
- 3.2 The requirements of Condition 3.1 shall also apply to abnormal emissions occurring as a result of plant malfunction or breakdown.
- 3.3 A log book shall be established and maintained which contains a record of all observations made in accordance with the requirements of this Permit. The records shall include the time and date of the observations, the locations from which the observations were made, the source of any emissions to air, details of any corrective

action taken, and the name and position within the Company of the person undertaking the observations.

- 3.4 The operator shall keep records of inspection, monitoring and visual assessments at the installation for a period of at least two years. The records shall be made available for the Regulator to examine on request.

Techniques to Control Fugitive Emissions

- 4.0 Loading to and from stockpiles, and construction and management of stockpiles and unloading operations shall be as to minimise wind-borne dust, eg taking place at sheltered points.
- 4.1 The minimisation of drop heights shall be undertaken in stockpiling to reduce wind whipping of dust.
- 4.2 An adequate supply of water shall be provided and maintained for the purposes of dust suppression. In addition, all water suppression systems shall be afforded adequate frost protection.
- 4.3 Where dusty materials are stored, stockpiles shall be wetted as necessary to minimise dust emissions. Fixed water sprays shall be installed to stocking areas as appropriate.
- 4.4 Stockpiles shall be suitably profiled and conditioned with water according to weather conditions.
- 4.5 Storage areas shall be kept in a condition that does not give rise to visible dust emissions.
- 4.6 Unused stocking areas shall also be controlled to prevent visible dust emissions.

Process Operations

- 5.0 Materials shall be deposited carefully onto the screen to minimise airborne dust emissions.
- 5.1 Deposits of dust on external parts of the plant shall be cleaned off at the end of each working day to minimise the potential for wind entrainment.
- 5.2 Vehicles shall be loaded as to minimise airborne dust emissions for example by loading with wet materials or by using a load out area protected by an enclosure or a dust suppression system.
- 5.3 Processed materials likely to generate dust shall be conditioned with water prior to internal transfer.
- 5.4 Roadways in normal use and any other area where there is regular movement of vehicles shall have a consolidated surface capable of being kept clean to minimise dust emissions.

Training

- 6.0 Training of all staff with responsibility for operating the process shall include:
- awareness of their responsibilities under the Permit, for example
 - minimising emissions on start up and shut down
 - action to minimise emissions during abnormal conditions
- 6.1 The operator shall maintain a statement of training requirements for each operational post and keep a record of the training received by each person whose actions may have an impact on the environment. These documents shall be made available to the Regulator on request.

Maintenance

- 7.0 The Brown Lennox Crusher (Serial no. M1144559) and Extec Robo Trac, (Serial no. 6138) shall be maintained in accordance with the manufacturer's recommendations. A record of such maintenance shall be made available for inspection, and a summary of maintenance carried out in the previous 12 months shall be sent to the Regulator on 31st March once a year by the operator.
