This introductory note does not form a part of the Permit

The following Permit is granted under Regulation 13 of the Environmental Permitting (England and Wales) Regulations 2010 (S.I.2010/675) (“the EP Regulations”) to operate an installation carrying out one or more of the activities listed in Part B to Schedule 1 of those Regulations, to the extent authorised by the Permit.

The Permit includes conditions that have to be complied with.

Techniques include both the technology used and the way in which the installation is designated, built, maintained, operated and decommissioned.

Confidentiality

The Permit requires the Operator to provide information to Cannock Chase District Council. The Council will place the information onto the public registers in accordance with the requirements of the EP Regulations. If the Operator considers that any information provided is commercially confidential, it may apply to Cannock Chase District Council to have such information withheld from the register as provided in the EP Regulations. To enable Cannock Chase District Council to determine whether the information is commercially confidential, the Operator should clearly identify the information in question and should specify clear and precise reasons.

Variations to the Permit

Your attention is drawn to the Variation Notification Procedure condition in the permit. This Permit may be varied in the future. If at any time the activity or any aspect of the activity regulated by the following condition changes such that the conditions no longer reflect the activity and require alteration, the Regulator should be contacted.

Revocation of the Permit

Where an Operator intends to cease the operation of an installation (in whole or in part) the regulator should be informed in writing. The Regulator may revoke a Permit in whole or in part, and may require the operator to take steps to avoid a pollution risk resulting from the operation of the regulated facility.

Transfer of the Permit or part of the Permit

Before the Permit can be wholly or partially transferred to another person, a joint application to transfer the Permit has to be made by both the existing and proposed holders, in accordance with Regulation 21 of the EP Regulations. A transfer will be allowed unless the Authority considers that the proposed holder will not be the person who will have control over the operation of the installation or will not ensure compliance with the conditions of the transferred Permit.

Contacting the Regulator

This Permit has been issued by Cannock Chase District Council as the Regulator for this installation and the address above (Page 2) is the principal contact address for all matters relating to the Permit.

Responsibility under workplace health and safety legislation

This Permit is given in relation to the requirements of the EP Regulations. It must not be taken to replace any responsibilities you may have under workplace health and safety legislation.

Appeal against permit conditions

Anyone who is aggrieved by the conditions attached to a permit can appeal to the Appropriate Authority (Secretary of State for the Environment, Food and Rural Affairs in England, and the Welsh Ministers in Wales). Appeals must be made in accordance with the requirements of Regulation 31 and Schedule 6 of the EP Regulations.

Appeals should be received by the Secretary of State for Environment, Food and Rural Affairs or the Welsh Ministers at the following addresses;

The Planning Inspectorate
Environment Team, Major and Specialist
Casework
Room 4/04 Kite Wing
Temple Quay House
2 The Square
Temple Quay
Bristol BS1 6PN

Or for appeals in Wales:

The Planning Inspectorate
Crown Buildings
Cathays Park
Cardiff CF10 3NQ

Please Note

An appeal brought under Regulation 31 (1) (b) and Schedule 6, in relation to the conditions in a permit will not suspend the effect of the conditions appealed against; the conditions must still be complied with.

In determining an appeal against one or more conditions, the Act allows the Secretary of State in addition to quash any of the other conditions not subjected to the appeal and to direct the local authority either to vary any of these or other conditions or to add new conditions.

You will be liable for prosecution if you fail to comply with the conditions of this permit. If found guilty, the maximum penalty for each offence if prosecuted in a Magistrates Court is £50,000 and/or 6 months imprisonment. In a Crown Court it is an unlimited fine and/or 5 years imprisonment. Our enforcement of your permit will be in accordance with the Regulators' Compliance Code¹.

Permit

Permit Number 3.5(c) EPR 01/06

Cannock Chase District Council (the Regulator) in exercise of its powers under Regulation 13 of the Environmental Permitting (England and Wales) Regulations 2010 (S.I.2010/675) hereby permits.

The Raw Material Company (Cannock) Limited (“the operator”),

Whose registered offices are:

**Walford Works,
Longford Road,
Cannock,
Staffordshire. WS11 0LF**

To operate an installation comprising a mobile crusher to the extent authorised by and subject to the conditions of this Permit.

Signed

Head of Environmental Health
The Proper Officer Designated to sign on behalf of the Council
Cannock Chase Council

Date

Activity description

The Raw Material Company (Cannock) Limited is hereby permitted, in accordance with the requirements of the Environmental Permitting (England and Wales) Regulations 2010, to carry out a mobile crushing and screening activity as prescribed by Section 3.5 Part B(c) of Schedule 1, Part 1, (as amended) to the above Regulations, subject to the conditions outlined in this Permit.

Serial number	Plant Type
73337	McCloskey J40v2 2016

The operator is authorised to operate the activity in England and Wales, subject to the following conditions.

Conditions**Asbestos**

1. Asbestos shall not be crushed or screened.

Notifications

2. The operator shall, before the mobile plant is operated, notify the regulator of the site where the mobile plant is to be operated, and the regulator who issued the permit:
 - a. where and when the mobile plant is expected to start operating, and
 - b. the serial number of the mobile plant involved.

Emissions and monitoring

3. No visible particulate matter shall be emitted beyond the site boundary where the plant is operated.
4. The emission requirements and methods and frequency of monitoring set out in Table 1 shall be complied with.
5. All plant and equipment capable of causing, or preventing, emissions shall be maintained in accordance with the manufacturer's instructions. Records shall be kept of such maintenance.

Aggregates delivery and storage

6. Dusty materials (including dusty wastes) shall only be stored in designated storage locations, and shall be subject to suppression and management techniques to minimise dust emissions.

Crusher and screening units

7. The crusher shall be totally contained or fitted with a water suppression system over the crusher aperture
8. Where the use of water as a method of dust suppression is necessary in order to meet the emission limits, it shall be used. In such circumstances, if water of the required pressure is not available for use on the suppression system, then the process shall not operate.
9. Deposits of dust on external parts of the plant shall be cleaned off at the end of each working day in order to minimise the potential for wind entrainment.

10. Processed materials likely to generate dust shall be conditioned with water prior to internal transfer.

Belt conveying

11. All dusty materials, including wastes, shall be conveyed using the McCloskey J40 v2 conveyor, fully enclosed along its entire length. All transfer points shall be fitted with a water suppression system.

Loading, unloading and transport

12. No potentially dusty materials (including wastes) or finished products shall arrive on or leave the site other than by use of fully enclosed or sheeted vehicles.

Roadways and transportation

14. All areas where there is regular movement of vehicles shall have a consolidated surface capable of being cleaned, and these surfaces shall be kept clean and in good repair, or shall be kept wet. Quarry haul roads are excluded from this provision.
15. Vehicles shall not track material from the site onto the highway.

Records and training

16. Written or computer records of all tests and monitoring shall be kept by the operator for at least 18 months. They shall be made available for examination by the Council. Records shall be kept of operator inspections, including those for visible emissions.
17. Staff at all levels shall receive the necessary training and instruction to enable them to comply with the conditions of this permit. Records shall be kept of relevant training undertaken.

Best available techniques

18. The best available techniques shall be used to prevent or, where that is not practicable, reduce emissions from the installation in relation to any aspect of the operation of the installation which is not regulated by any other condition of this permit.
19. If the operator proposes to make a change in operation of the installation, he must, at least 14 days before making the change, notify the regulator in writing. The notification must contain a description of the proposed change in operation. It is not necessary to make such a notification if an application to vary this permit has been made and the application contains a description of the proposed change. In this condition 'change in operation' means a change in the nature or functioning, or an extension, of the installation, which may have consequences for the environment.

Table 1 Emission limits, monitoring and other provisions				
Substance	Source	Emission limit/ provisions	Type of monitoring	Monitoring frequency
Particulate matter	Whole process	Avoidance of visible emissions crossing the (construction) site boundary	Recorded operator observations	On start up and on at least two more occasions each day
Smoke	Engines	No visible smoke during normal operation	Recorded operator observations	On start up and on at least two more occasions each day
